Add User Column

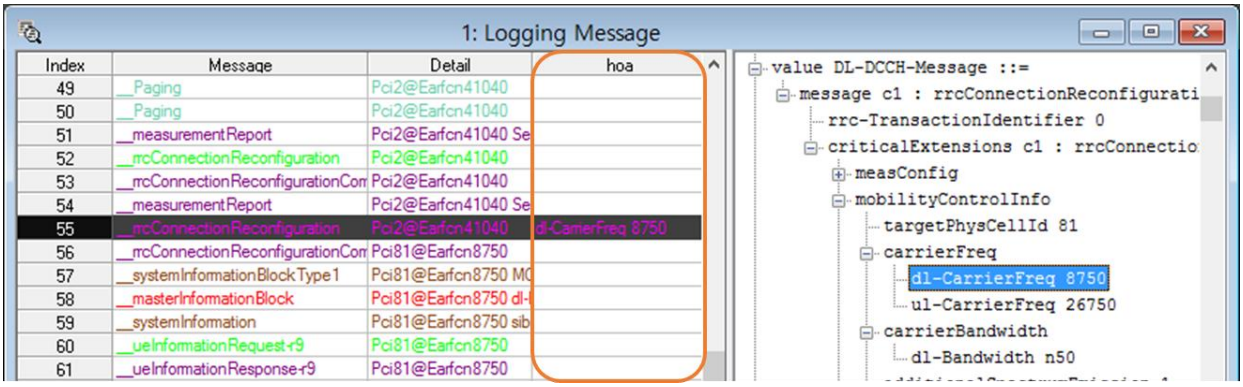

This feature allows you to add important information from Packet to Viewer when analyzing Log information in Message Viewer.

Here is how to add a User Column in the Message Viewer.

1. Select the Add User Column menu from Message Viewer
2. On the Add User Column screen, click the Add button in the lower left corner.
3. Enter a title in the Name section and a text to search in String Section.

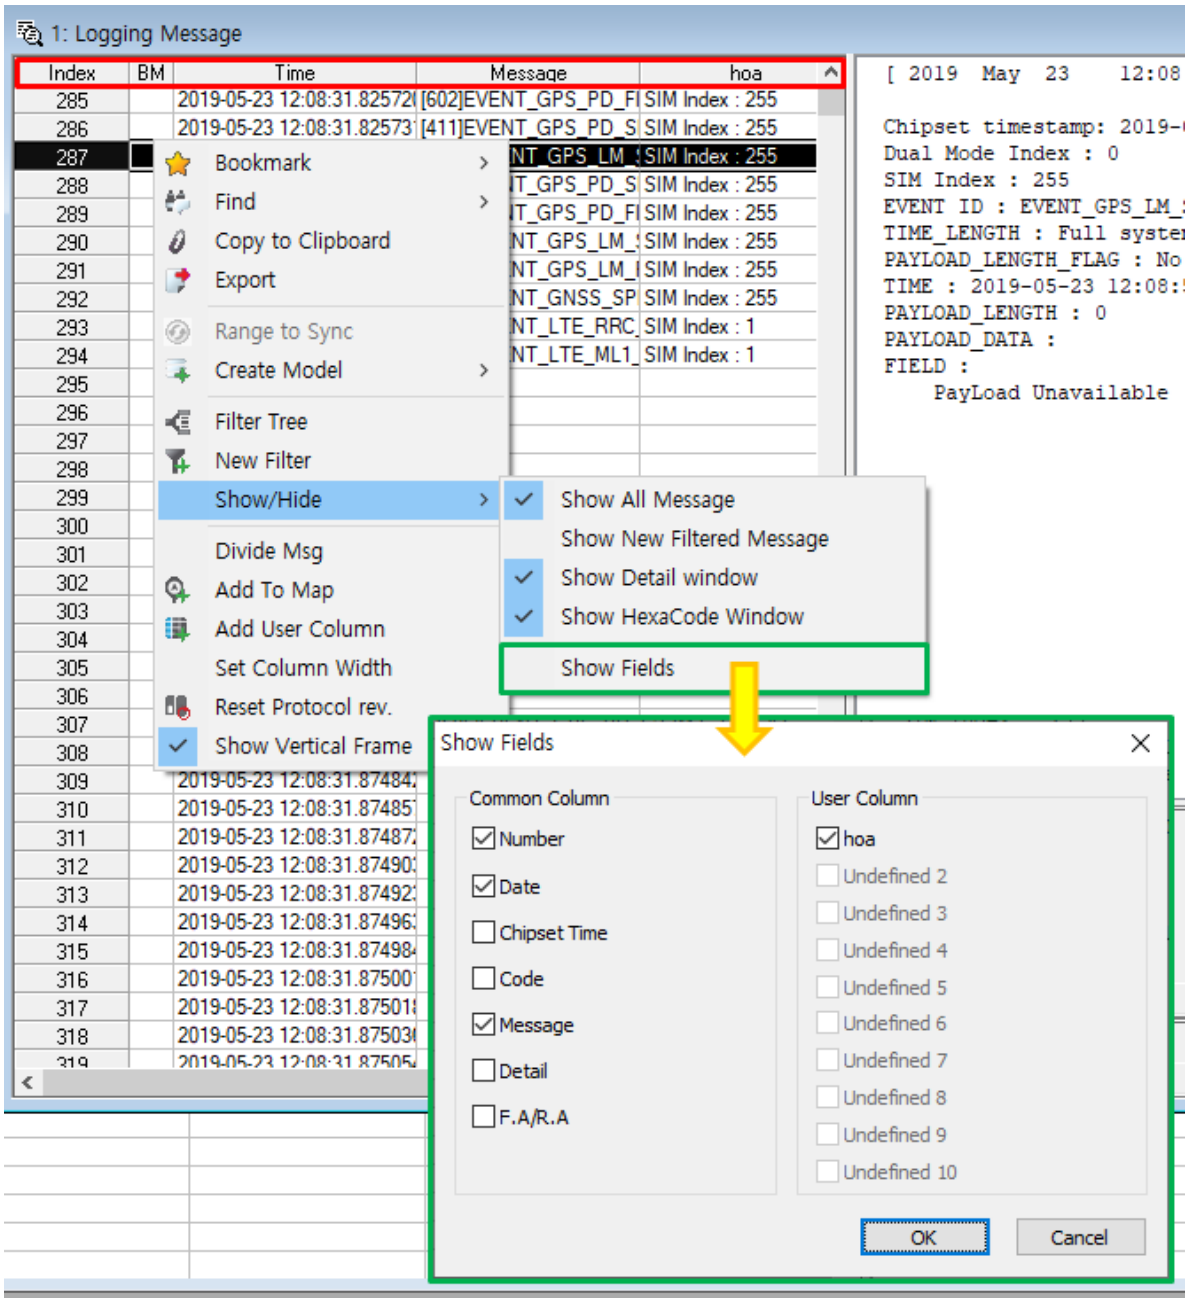

<Result Screen>

When Using Find Function

The Find feature provides a quick way to check if the logs contain information.

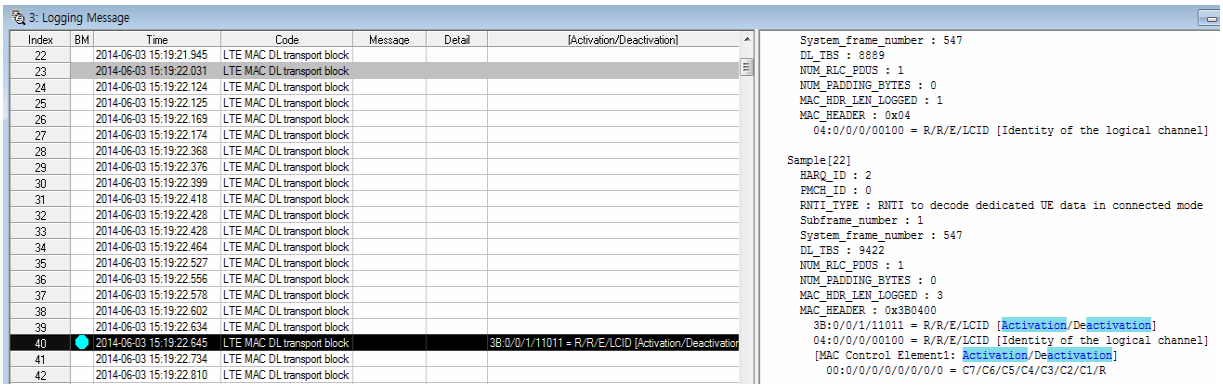

The usage is as follows:

1. Right-click to select Find Dialog from the Find menu.

2. When you press Find next, the message viewer displays bookmark and detail view window highlights sky-blue as shown below.

3. The function resets the bookmark when adding a message from the filter, and when searching by pressing Find All, it takes as long as the Add user column runs. You can use it for your purposes.
